Big Sky plays adventuresome, beautiful rock music with melodies and lyrics that want to live in your head. Shining vocals, Throat-Singing and otherworldly ethno-sounds, and rocking grooves combine for a truly unique style. Organic heaven-and-earth, with electricity...

We have been told our live shows can be a transcendental experience! Spacy dancing abounds! Live venues have included the Route 66 Music Festival in Springfield, MO, where we performed for tens of thousands, Harmony Park; Club MP3.com in San Diego; Earth Mother Mind Jam 2002; and Twin Cities clubs including The Cabooze, The Fine Line Music Cafe, O'Garas, The Turf Club, and 7th St. Entry, to name a few. Big Sky is currently in the studio working on our next CD.

We've also become one of the most successful indie rock bands on the web, with hundreds of thousands of listens and numerous awards, features, and interviews. MP3.com invited listeners to "Discover the Greatest Undiscovered Rock Band in America."

Big Sky's debut CD, *STANDING ON THIS EARTH* presents 12 original songs with a unique and identifiable sound all its own. Media including radio (MN Public Radio, Cities 97, KQRS, KFAI, and numerous college stations), television (Channel 9 BUZZ, KTCN live performance), and the press (Star Tribune, St. Paul Pioneer Press, City Pages, MN Daily, and others) have heralded Big Sky's original sound, which combines strong songwriting and vocals with sophisticated musicianship and high production values.
